

Saepul Malik — CV (Frontend Developer, ReactJS)

linkedin.com/in/saepulmalik27 · github.com/saepulmalik27 · saepulalmalik@gmail.com · +62 895-2733-4546 · www.saepulmalik.my.id

PROFILE

Frontend Developer with 8 years of experience, 4+ of them focused on React and Next.js — building responsive, reusable UI components and integrating them with REST APIs for enterprise products serving tens of thousands of users. Comfortable across React Hooks and state management (Redux Toolkit, Zustand), works daily with designers, backend engineers, and QA in an Agile/Scrum flow, and treats code review and performance troubleshooting as part of the job, not an afterthought.

EMPLOYMENT HISTORY

Frontend Engineer | PT Inspigo Inovasi Indonesia (2021 – Present)

- Built and maintained high-performance web applications using Next.js and React, translating Figma designs into pixel-accurate, responsive UI across Inspigo's products.
- Designed a config-driven UI architecture — reusable, composable components rather than one-off screens — for Inspigo For Business, now serving ~350 enterprise clients (~35,000 end users).
- Built a reusable form system (React Hook Form + Zod) with client-side validation, and the admin dashboard's chart/reporting components, both consumed across every Inspigo content type via REST APIs.
- Integrated frontend features against REST APIs for Inspigo AI's chat product (OpenAI/Bedrock-backed), including real-time streaming UI.
- Took part in code review and sprint planning with designers, backend engineers, and QA in an Agile/Scrum team; monitored and optimized site performance (Core Web Vitals) as an ongoing responsibility.

Full Stack Developer | PT Praweda Sarana Informatika (Outsourced by PT Indocyber) (2018 – 2021)

- Developed web applications using PHP (Laravel, CodeIgniter, CakePHP) and Vue.js, including REST API design consumed by the frontend.
- Built a Shipyard Project Management System from the ground up (Laravel + Vue.js + PostgreSQL), centralizing project/warehouse tracking and closing a prior fraud vector in the inquiry/quotation process.
- Maintained and extended a Trucking Management Application, adding GPS-based route and parking-dwell-time tracking.

Full Stack Developer Trainee | PT Indocyber Global Technology (2018)

- Trained in C#, Java, SQL Server, and JavaScript.
- Built a Library Management System (MVC, .NET + Java Spring) as a final project.

EDUCATION

Physics — IPB University, 2013 – 2017

TECHNICAL SKILLS

- **Core:** JavaScript (ES6+), TypeScript, HTML5, CSS3, responsive web design

- **React:** React.js, Next.js, React Hooks, Redux / RTK, Zustand, Context API
- **API/Integration:** REST API integration, React Hook Form + Zod
- **UI:** Tailwind CSS, shadcn/ui, Recharts
- **Tooling:** Git & GitHub, GitHub Actions (CI/CD), Figma-to-code
- **Practices:** Agile/Scrum, code review, cross-functional collaboration (design/backend/QA), performance troubleshooting
